### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Theobald Dengler on 6/17/2006.

2. The application has been amended as follows:

- Claim 29 has been canceled.
- In claim 7, line 9, after "web" --, each said plate printing area being annular and extending uninterrupted in a circumferential direction of said plate cylinder, each said plate printing area printing a different ink-- has been inserted.
- In claim 25, line 10, "." has been deleted and replaced with --;--.
- In claim 25, after line 10, the following new lines have been inserted:  
--a damping agent transfer roll in contact with said roll and transferring damping agent to said roll;  
a damping agent applicator roll in contact with said roll and receiving damping agent from said roll.--.
- In claim 30, line 1, "29" has been deleted and replaced with --25--.

3. The above changes have been made in order to patentably distinguish the claims above the prior art of record.

Art Unit: 2854

4. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowability of claim 7 is the limitation of a roll with at least two partial ink-friendly area running around the central axis of the roll, at least one annular area made of an ink-repellent material, a plate cylinder where each plate printing area is annular and extends uninterrupted in a circumferential direction of the plate cylinder where each plate printing area prints a different ink, in combination with the other claimed language.

The primary reason for the allowability of claim 18 is the limitation of a roll with a plurality of ink-friendly partial areas running around a central axis of said roll, an annular area made of an ink-repellent material arranged between the partial areas, a damping agent transfer roll in contact with the roll, a damping agent applicator roll in contact with the roll, in combination with the other claimed language.

The primary reason for the allowability of claim 25 is the limitation of a roll with a plurality of ink-friendly areas running around a central axis of said roll, an ink-repellent area extending fully around the central axis of the roll and being arranged between the ink-friendly areas, a damping agent transfer roll in contact with the roll, a damping agent applicator roll in contact with the roll, in combination with the other claimed language.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
